Climate Change Policy

Thai Hoover Industry Co., Ltd. recognizes the importance of sustainable development under the principle of taking into account social and environmental impacts throughout the supply chain. The company has set up a continuous monitoring and assessment of risks and impacts in its business operations, not only in terms of dedication to improving the environmental management system within the factory, but also in planning to implement projects that respond to the agreements in the United Nations Framework Convention on Climate Change (UNFCCC). Therefore, the company has continuously emphasized the assessment of the organization's greenhouse gas emissions.

The company is committed and will voluntarily control greenhouse gas emissions and is aware and gives importance to all levels in the supply chain to participate in controlling the increase in global temperatures according to the Paris Agreement to be below 2 degrees Celsius on average, committed to net-zero emissions in 2050. The company commits to support to not funding climate-denial against climate regulations. Moreover, Thai Hoover commits to stakeholder engagement and capacity building on environmental issues, aiming to educate employees to be able to implement policies to achieve the specified objectives and provide continuity in driving the policies to be sustainable.
